1. Specifications

--- | ---
Nominal diameter | Pressure | Flow direction | Gas type
40 | 0 (actual flow rate type) | L (left to right) | 13A (city gas 13A)
50 | 500 (conversion flow rate type 500 kPa) | R (right to left) | PRO (propane)

| Connection diameter | JIS10K 40A flange | JIS10K 50A flange
--- | --- | ---
Flow-rate range (Actual flow) | [m^3/h]
--- | --- | --- | ---
Model | UZ40 | UZ50 | UZ50
Gas type | 13A, PRO, BTN, N2, AR | 13A, N2, AR | PRO, BTN
Flow rate range | +1.6 to 80 | +3.0 to 150 | +3.0 to 80

Accuracy

- Flow-rate measurement accuracy (Actual flow) | [m^3/h]
--- | --- | --- | ---
Model | UZ40 | UZ50 | UZ50
Gas type | 13A, PRO, BTN, N2, AR | 13A, N2, AR | PRO, BTN
Accuracy | ±0.5%FS | +1.6 to 8.0 | +3.0 to 15.0
| ±1.0%FS | +8.0 to 80 | +15.0 to 150
| ±4.0%RD* | +8.0 to 80 | +15.0 to 150

* In case a distance from an elbow of minimum 10D in the upstream side and 5D in the downstream side of the meter can be secured: ±2.0%RD

- Conversion accuracy

±1.5%RD (at 500 kPa, 23°C)
Conversion standard temperature: -10 to +60°C (In unit of 1°C)
Conversion standard pressure: 0.00 to 10.00 kPa (In unit of 0.01 kPa, gauge pressure)
Atmospheric pressure under operating environment: 0.0 to 200.0 kPa (In unit of 0.1 kPa, absolute pressure)

Low flow cutoff In case the measurement flow-rate is lower than Qcut, 0 m³/h is displayed for instantaneous flow-rate
Qcut (can be changed by button operation and communication)
Initial setting value | UZ40 | UZ50
--- | --- | ---
+0.3 | +0.6

Unit: Correlated to unit of sub display value

Response-ability
Instantaneous flow-rate display value 0.5 second (smoothing by moving average method (initial setting value: 4 times))
Pressure display value 0.5 second (smoothing by moving average method (initial setting value: 10 times))
Temperature display value 0.5 second

"⊗" are selectable items.
**Product Specifications**

**Ultrasonic Flow Meter for Fuel Gas (External Power Supply 100 VAC Type)**

**Model**

---

**Display**

Main display: The following is switched and selected using the “left button”.
- Accumulated flow volume (m³) · Trip accumulated flow volume (m³)

Sub display: The following is switched and selected using the “right button”.
- Conversion flow type: Instantaneous flow-rate (m³/h) · Pressure (kPaG) · Temperature (°C)
- Actual flow type: Instantaneous flow-rate (m³/h) · working gas pressure setting value (kPaG) · Temperature (°C)

**Number of digits displayed**

- **Main display**
  - Accumulated flow volume (Forward flow) [m³]: 00000000.0 9 digits
  - Trip accumulated flow volume (Forward flow) [m³]: 0000000.0 8 digits

- **Sub display**
  - Instantaneous flow-rate [m³/h]:
    - 000.00 (less than 1000) 5 digits
    - 0000.0 (1000 or more and less than 10000) 5 digits
    - 00000 (10000 or more) 5 digits
  - Pressure [kPa]:
    - 0000.0 (conversion flow type) 5 digits
    - 000.00 (actual flow type) 5 digits

- In the conversion flow rate type, in case the pressure measurement value is less than 5 kPa, 0 kPa is displayed.
- In the actual flow rate type, the working gas pressure setting value is displayed.

- Temperature [°C]: 00.0 3 digits

**Contact output**

- Nch open drain output 2 channels
- Pulse output Nch open drain output 1 channel
  - Pulse unit: 1000 L/P (initial setting value) (can be changed by button operation)
  - (can be changed to 10, 100, 1000 and 10000 L/P)
  - Maximum load: 26.4 VDC·50 mA
  - Duty: 20 to 80%
  - Saturated voltage when ON: 1.5 V or less
  - Current when OFF: 50 μA or less
  - Maximum frequency: 10 Hz

### Ver. 5

#### Model

**Ultrasonic Flow Meter for Fuel Gas**

**External Power Supply 100 VAC Type**

- **Nominal diameter**
- **Pressure**
- **Flow direction**
- **Gas type**

**Model**: UZ

<table>

- **Accumulated value upper limit alarm**
  - When the accumulated flow volume for 1 h becomes higher than the set accumulated flow rate upper limit volume, an alarm signal is output.
  - (The accumulated flow volume upper limit value can be set by communication.)
  - *The 1 h measurement is started when the power supply is turned on.

- **Flow rate upper and lower limit alarm output**
  - When the instantaneous flow rate becomes higher or lower than the set flow rate, an alarm signal is output.
  - (The alarm output upper and lower limit flow rate and alarm judgment value hysteresis width can be set by button operation.)

### Current output

- **Output method**: 4 to 20 mA
- **Discharge method**: 
- **Output accuracy**: ±0.1 mA (flow measurement accuracy, temperature measurement accuracy and pressure measurement accuracy are excluded)
- **External load**: 400 Ω or less
  - (“Instantaneous flow rate”, “Pressure” and “Temperature” can be switched by a button operation and communication.)

- **Zero output current**: 4.0 mA (reverse flow to low flow cutoff)
- **Output current lower limit**: 4.0 mA (clip at 4.0 mA)
- **Output current upper limit**: 22.0 mA (clip at 22.0 mA)

### Full scale flow rate (can be changed by button operation and communication)

- **Unit**: Correlated to unit of sub display value

### Communication

- **Communication method**: Half duplex communication method (RS485 communication)
- **Communication speed**: 4800 bps, 9600 bps (Allowable range: ±1.0%)
- **Synchronization method**: Asynchronous
- **Bit configuration**: 8 bits, no parity, stop bit length 1 bit
- **Bit transmission order**: Order from b0 to b7 (low order prioritized sending)
- **Error control**: CRC

*For the detailed communication specifications, download the communication specifications from the product introduction page.*

2. Precautions in handling

2-1. Installation environment

(1) Although the high weather-proof electronic display is adopted, in case of installation at a place subjected to direct sunlight, provide a sunshade.

(2) Do not install the flow meter at a place with much electromagnetic noise, in corrosive atmosphere, or with high humidity liable to cause dew condensation.

(3) This product is designed for outdoor installation, but avoid areas where there is a risk of water submergence and water always splashes.

(4) The meters do not conform to ATEX (explosion-proof) directive (2014/34/EU).

2-2. Piping conditions

(1) In case propane or butane is the fluid to be flown, make sure to use the flow meter under conditions that the fluid does not become oil mist state due to re-liquefaction, etc.

(2) Even though the meter is installed indoor, it cannot be installed with the position that the display portion faces downward or the cable introduction portion faces upward.

(3) When installing it at the upstream or downstream of the governor, install it 10D or more away from the governor.
